PROFILE

Experienced Software Engineer with 5+ years of experience in full-stack and backend development, specializing in React, Python, and AWS cloud services. Proven ability to design scalable systems, optimize performance, and deliver high-impact solutions in Agile environments. Strong background in CI/CD, DevOps practices, and SDLC driven development, with a focus on building efficient, production-ready applications.

EDUCATION

Lambton College

Ottawa, ON

Post Graduation in Full-Stack Software Development, GPA: 3.60/4

Sept. 2024 – Apr. 2026

Dr. A.P.J. Abdul Kalam Technical University

India

Bachelor of Technology in Computer Science and Engineering, GPA: 6.7/10

Aug. 2015 – Jun. 2019

EXPERIENCE

Coordinator - Engineering Projects (Co-op)

January 2026 – April 2026

Portage Cybertech Inc.

- Designed and delivered scalable end-user applications, enterprise APIs, and SDKs across the full SDLC to support production-ready systems and ensure reliable feature delivery
- Built and maintained Java Spring Boot microservices to support scalable backend architecture, integrating messaging systems and working with MongoDB, PostgreSQL, and MySQL for efficient data processing and system reliability
- Led cloud deployment and cross-team alignment by supporting AWS infrastructure including ECS Fargate, EC2, Lambda, and S3, while enhancing CI/CD pipelines using Docker, Jenkins, Terraform, and container orchestration exposure with Kubernetes

Senior Software Engineer

October 2023 – August 2024

To The New Pvt. Ltd.

- Built scalable React applications with reusable components, improving performance and reducing delivery time by 20%
- Integrated frontend with Node.js services and SQL/MongoDB, enabling reliable full-stack feature development
- Worked with AWS services to support deployment and monitoring of applications in cloud environments
- Applied modern JS tooling (ES6+, Webpack, Babel) to optimize build performance and maintainability
- Strengthened UI quality using Jest/RTL testing and accessibility standards, improving audit scores by 25%
- Collaborated on A/B testing initiatives to evaluate UI changes and improve user engagement

Software Engineer

November 2021 – October 2023

To The New Pvt. Ltd.

- Published multiple technical blog on WCAG accessibility, sharing implementation best practices [Link](#)
- Built and optimized UI components and API-driven features, reducing UI-related issues by 25%
- Improved rendering performance and responsiveness, reducing page load time by 20%
- Applied OOP and functional design principles, improving code structure and maintainability
- Contributed to testing, debugging, and code reviews, improving application stability and code quality
- Refactored legacy components, reducing technical debt and improving developer productivity
- Recognized with multiple awards (Star Performer, Most Impactful Team, Fastest Growing Team) for contributing to 25% faster delivery, 20% higher productivity, and stronger client satisfaction.

Associate Software Engineer

February 2019 – September 2021

J&F Pvt. Ltd.

- Translated UI/UX designs into functional applications and set up frontend projects from scratch
- Built responsive, cross-browser layouts and reusable components, ensuring consistent UI behavior
- Collaborated with stakeholders to support feature estimation and delivery planning, improving project timelines by 40%
- Integrated APIs and supported backend functionality for end-to-end development
- Managed post-release maintenance and bug fixes, improving application stability and user experience

PROJECTS

Frinqlo | *React, Typescript, Vite, Tailwind CSS, Radix UI, TanStack React Query*

- Built a group expense-sharing platform by implementing flexible bill splitting (equal/custom), automated balance calculation, and shared expense visibility, enabling real-time tracking of “who owes whom” and eliminating manual reconciliation
- Developed receipt-based expense logging with image upload (OCR-ready) by enabling shared receipt visibility across users, improving expense traceability and reducing disputes
- Designed a real-time system with history and insights using React Query and Supabase, ensuring consistent data synchronization, complete expense history, and enhanced financial transparency

API Test Automation Suite | *Python, Flask, Pytest, REST API, Automation Testing*

- Developed a UI-driven API testing platform to replace manual script execution, reducing test execution effort by 60% and accelerating validation cycles by 40%.
- Implemented a Flask-based orchestration layer to dynamically trigger pytest suites and generate structured reports, improving test result visibility and reducing debugging time by 50%
- Deployed the application on Render, enabling live test execution and demonstrations, achieving 99% uptime and reducing setup time from hours to minutes

Url Shortner | *Python, Flask, SQLite, HTML, CSS, JavaScript, REST API*

- Developed a URL shortener application to address inefficient link management and tracking, enabling users to generate and manage shortened URLs efficiently.
- Implemented backend logic using Flask and SQLite to support persistent storage, URL validation, and reliable redirection, ensuring data consistency and system stability.
- Enhanced user experience by integrating click tracking, recent URL history, and usability features, improving accessibility and interaction with the system..

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Typescript, Python, Bash, Shell scripting

Frameworks: React, Node.js, Flask, Spring Boot

Frontend: HTML, CSS, Tailwind CSS, SCSS

Backend & APIs: REST APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Cloud & DevOps: AWS (EC2, S3, Lambda, ECS Fargate), GitHub Actions, Docker, Jenkins, Terraform, CI/CD

Testing: Jest, React Testing Library, Pytest

Tools: Git, GitHub, Bitbucket, Jira, Confluence, VS Code, PyCharm

Methodologies: Agile (Scrum), Sprint Planning, Estimation

Operating Systems: Linux, Ubuntu
